

### **TagMaster UK Ltd Carbon Reduction Plan**

Publication date: 13th August 2025

### **Commitment to achieving Net Zero**

TagMaster UK Ltd is committed to achieving Net Zero emissions by 2050 (or earlier where possible).

#### **Baseline Emissions Footprint**

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Scope 1. Direct Emissions. These are emissions that are based on TagMaster UK's fuel consumption for vehicles used for business purposes.

Scope 2. Indirect Emissions from Purchased Energy. This covers emissions from sources that TagMaster UK owns or controls directly – ie. Building energy and consumption

Scope 3. Indirect Emissions in the Supply Chain. This covers emissions which are emissions that result from the organizations supply chain but occur outside of the organization's direct operations.

Baseline Year: Oct 2019 to Sept 2020

Additional Details relating to the Baseline Emissions calculations.

Baselines for energy consumption and emissions were started in 2019, these baselines will guide future targets and energy performance indicators.

Baselines have been set for energy used in our HQ and fuel usage.

Baseline year emissions: Oct 2019 to Sept 2020

EMISSIONS	TOTAL (tCO <sub>2</sub> e)	
Scope 1	24.5	
Scope 2	38.0	
Scope 3	35.7	
	Business Travel	0.5
	Employee Commuting	24.8
	Upstream transport & distribution	0.4
	Downstream transport & distribution	2.3
	Waste	7.7
Total Emissions	98.2	

# **Current Emissions Reporting**

Reporting Year: Oct 2023 – Sept 2024				
EMISSIONS	TOTAL (tCO <sub>2</sub> e)			
Scope 1	6.9			
Scope 2	17.7			
Scope 3	28.8			
		Business Travel	0.1	
		Employee Commuting	20.8	
	Ups	tream transport & distribution	0.5	
	Downs	tream transport & distribution	0.5	
		Waste	6.9	
Total Emissions	53.4			

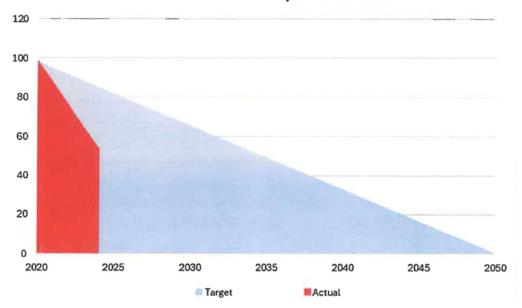

## **Emissions reduction targets**

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

- Below 65.5 tCO2e by 2030 (or sooner)
- Below 32.8 tCO2e by 2040 (or sooner)
- Below 0.1 / Net Zero by 2050 (or sooner)

## **Carbon Reduction Projects & Initiatives**

The following environmental management measures and projects have been completed or implemented since the 2019/20 baseline. The carbon emission reduction achieved by these schemes was available at Sept 2024, following 12 months of comparable statistics.

- TagMaster UK Ltd continues to be certified by a Peers Quality Assurance Ltd accredited body to ISO 14001 (held since 2008)
- Ongoing review of current office facilities, discussions for further energy improvements (including reduction in number of offices, greener energy provider)
- Reduction in business travel and enhanced IT support to allow for remote working and more virtual meetings held rather than in-person meetings.
- Introduction of Cycle Scheme for Employees

## **Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.15

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed:

Jonas Svensson

Chief Executive Office
